

# Scientists Have Proven That 95% Of All Modern Disease Is Caused By “Destructive Cellular Memories”

In 2008, Dr. Bruce Lipton, the world-renowned leader in cellular biology and quantum physics, and a former Stanford Medical School Research Cellular Biologist, published one of the most controversial yet compelling books in the history of medicine, called “The Biology of Belief”. In this book he scientifically PROVED, along with an agreement from the Centers for Disease Control and Prevention (CDC), that STRESS is the primary driving factor behind 95% of all modern disease

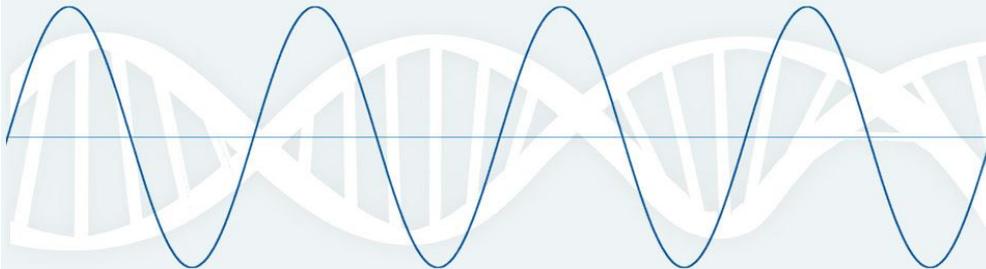

Dr. Bruce Lipton

## **But it gets better...**

He discovered that a specific type of stress, stress caused by something called “destructive cellular memories” which cause wrong beliefs... is the type of stress causing 95% of all modern illness and disease.

## **Let me explain.**

Dr. Lipton has scientifically proven that our DNA is guided by electromagnetic signals which are produced by our senses, thoughts, beliefs and emotions. This means that your DNA is not in control of your cells; your beliefs and how you respond to the environment are.

Your subconscious beliefs control your DNA.

## Here's how it works.

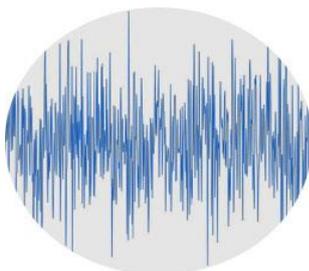

### Step #1: Physical Stress

You experience a stressful situation, either internally or externally. You may be either conscious or unconscious of this stressful situation.

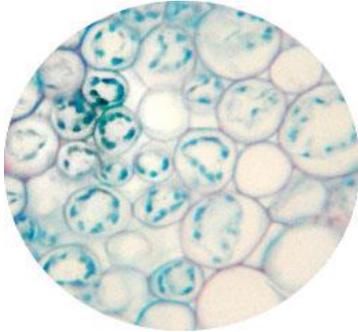

### Step #2: Chaotic Frequencies

This stress is created in the form of a negative frequency, also known as “chaotic hertz”, which we’ll discuss below.

### **Step #3: Imprinted Cellular Memory**

These negative frequencies create destructive cellular memories and cause mutation or “cell suicide”.

What’s important to note is that you don’t need to FEEL stressed in order for this process to occur. This process happens as your cells store memories of...

- **Physical stress from accidents, surgeries, abuse, fighting, etc...**
- **Emotional stress from heartache, fear, guilt, anger, overwhelm, etc...**
- **Mental stress from worry, low self-esteem, unworthiness, etc...**

These cellular memories are crucial to the health of your body... physically, emotionally and mentally.

In fact, according to Dr. Eric Nestler...

**“Your Cellular Memories Can Mean  
The Difference.  
Between A Healthy Life... And Death”**

**He continues...**

“Diseases that show up later in life could be due to negative memories programmed into cells as you age. Cancer can be considered the result of bad cellular memories replacing good ones. Psychological trauma, addiction, and depression may all be linked to such abnormal memories inside cells.” – Dr. Eric Nestler, MD, Ph.D.

Most medical doctors agree that the immune system is capable of healing just about anything if it's not suppressed by stress. And it is a widely accepted belief that when your immune system is working correctly, it's impossible to get sick.

But since negative frequencies can malfunction or even “turn off” the immune system, you become susceptible to all kinds of health issues.

This fully explains why...

## Until You Fix The Underlying Energy Controlling Your Health At A Cellular Level... It's Impossible To Be Fully Healthy And Happy!

---

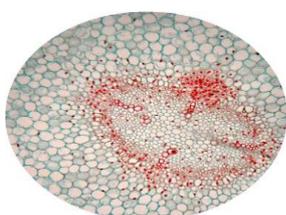

Western medicine is based on the principle that you can “see” the known cause of any disease, disorder or problem you're facing.

If you have back problems, they'll immediately give you an XRAY to determine your spine and disc alignment.

If you have weight problems, they'll immediately ask about your diet and exercise habits.

If you have depression, they'll have you talk to someone about it, load you up on depression pills which cause more harm than good, and send you on your way.

While these types of treatments may give temporary relief in the short-term, what doctors today miss is that these problems stem from a much, much more deep-rooted problem. **Your cellular memories.**

More, these chronic negative cellular memories are a key indication explaining the phenomenon you probably know all too well...

## Chronic “Mystery” Pain And Negative Feelings For No Reason

### **I’m sure you’ve been there.**

You go to the doctors with a pain or miserable mood... yet you can’t figure out why you feel that way. Or maybe it’s an unsettling feeling in the back of your mind causing you to worry, be anxious and even fearful of the future. Maybe you’ve been gaining weight for no apparent reason. Maybe your relationships have begun to crumble.

Maybe you can’t focus at work... or any sense of “peace” in your life has gone out the window... or...

### **... you get the idea.**

If you’ve ever talked to a doctor about any of these problems, you’ve likely heard the response “Give it a few weeks, then come back and tell me if your situation has improved”.

A few weeks go by. The situation has not improved. It’s gotten worse. So you go back and the doctor gives you a generic prescription to cover up the problem. You feel a little better so you’re happy, but then weeks later, a new problem emerges out of the blue.

## **This Is Your Body Screaming For Help!**

This is a common occurrence in the private clients I work with, before they come to me. I've heard this story thousands of times and I'm sure you've gone through something similar.

The reason you continue getting new problems just a short while after you cover up an existing issue has nothing to do with you or anything you're doing wrong. You've simply been given the wrong information and solutions that cover up only part of the problem.

In fact, you may have even ventured out to find solutions on your own after months... maybe even years of suffering from a lack of joy, happiness, peace and ill health in your life. And you've come across many solutions such as positive thinking, all-natural supplements, and even meditation.

But again we hit another roadblock, because the fact is...

## **Positive Thinking... Supplements... And Even Meditation... Do NOT Work By Themselves**

*This statement is liable to get the gurus and big-wigs chasing me with pitchforks, but I fully stand by the fact that things such as positive thinking, supplements, and yes, EVEN meditation.....*

*DO NOT WORK... by themselves.*

**Let me explain.**

The reason positive thinking, supplements and meditation don't work is because, again, it's not getting to the core of the problem. It's like riding a bicycle uphill. You'll make a little

progress in the beginning, but after awhile you'll be too tired... too exhausted to continue further as your results wane.

The moment you let up, you begin to slowly reverse course, peddling backward down the hill.

Within moments you're barreling down the hill, backward, and wind up exactly where you started. Or even worse!

You see, there's a power much stronger at play which is pushing against you harder than you can push against it. It's pushing you back 2 steps for every 1 step you take forward.

Fix this problem and you can finally unlock the true power of positive thinking, supplements and meditation. You can begin manifesting amazing transformations in your life like renewed energy... vigor and unlimited happiness, joy and peace without effort.

## “Chaotic Hertz”

Ever wake up on “the wrong side of the bed”... followed by a day that just kept getting worse, and worse, and worse?

Research now shows these days are NOT a coincidence. There is now a proven, scientific explanation for this phenomenon.

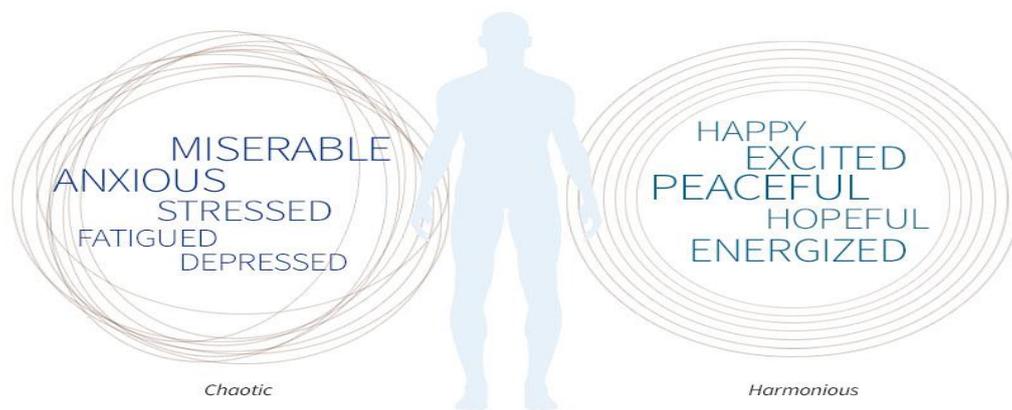

Chaotic Hertz is scientific jargon which simply means “energy pattern”. Science has now proven that certain energy patterns create vibrational frequencies which INFUSE your cells with either negative or positive energy.

From the moment you wake up until the moment you go to sleep, your body is in a constant state of flux which determines your energy frequency. When you feel depressed...

miserable... anxious... stressed... fatigued – these are all signs you’re vibrating in a chaotic frequency inside your cells.

When you feel happy... peaceful... excited... hopeful... and energized – these are signs you’re vibrating in a harmonious frequency.

Here’s a quick picture to demonstrate what I mean.

Your energy will measure somewhere on this scale depending on the level of CHAOTIC hertz you have in you (the low, negative, damaging frequencies) and the level of HARMONIOUS hertz you have in you (the high, positive, healthy frequencies).

In other words, the more chaotic hertz you have, the worse you feel. The more harmonious hertz you have, the better you feel.

THIS is why other treatments don’t work. Some may trick your brain, temporarily, to release excess “happy” chemicals that calm you down and make you feel better. But in the long run, treatments for depression and other related illnesses simply don’t work because nothing is being done to fix the vibrational frequencies which dictate the rest of your body.

Worse, failed attempt after failed attempt at healing yourself creates a downward spiral of anger, contempt and anxiety. All end up worsening how you feel on a daily basis.

Sound familiar? If so, here are...

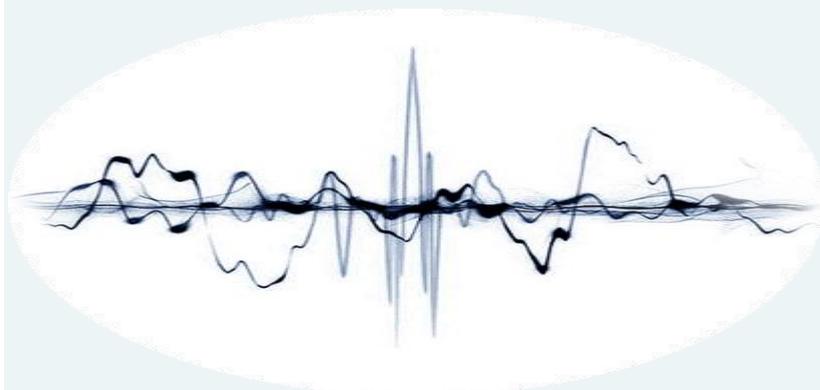

# Warning Signs You Suffer From Dangerously High Levels Of Chaotic Hertz

Every person on Earth has bad days. But as I'm sure you're aware, some of us (you), have bad days that turn into bad weeks... bad months... even years.

As the years go by you...

- Feel more anxiety...
- Accumulate higher stress levels even in less stressful situations...
- Have anger towards others...
- Feel jealousy, contempt and envy...
- Get sick more often and longer recovery periods...
- Worry about the future or even the past that you can't change...
- Overly indulge in food, drinks, sex, or shopping...
- Feel trapped, helpless and alone...
- Struggle to get through the day...
- Can't get out of bed in the morning...
- Can't fall asleep at night...
- Come down with a life-altering disease or disorder out of the blue...

These are ALL signs you have dangerously high levels of chaotic hertz consuming your energy and are negatively affecting your life.

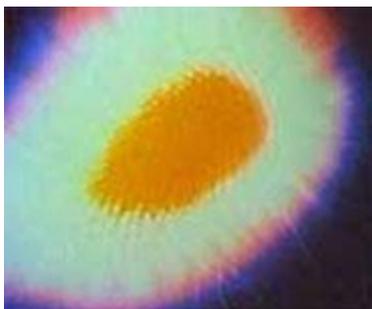

But before I show you how to resolve these problems for good and finally reclaim your happiness, joy, health and peace you once had, let me show you...

## A Shocking Example Of What's REALLY Going On Inside Your Body...

I understand that you might be thinking this is a little hard to believe because as they say

*“seeing is believing”.*

- But I want you to think about this...
- You can't "see" cellular waves... but yet you use your cell phone every day.
- You can't "see" gravity... yet I bet you wouldn't attempt to defy it.
- You can't "see" sound... but I'm sure you know that sound exists.
- With that said, I want you to know that thanks to the amazing breakthroughs in technology, scientists have discovered a way for you to visually SEE the effects of these frequencies.
- Check out the pictures on the right. You can see what Harmonious energy looks like in your fingertip when you focus on love (top picture) versus what Chaotic energy looks like when you feel anger (bottom picture).

Harmonious energy

chaotic energy

This is the difference in what your cells look like when you're in a positive, uplifting, happy mood versus a negative, angry, depressed mood. These images are an example of something called "Kirlian photography". Kirlian photography has the ability to transform ANY matter into an unseen world of energy that would otherwise be invisible to the naked eye.

Kirlian photographs caught the attention of scientists around the world because, for the first time, it was possible to SEE the energy of any matter, and also emotions, thoughts, and physical illness.

According to Dr. Peter Mandel, a pioneer in the development of new technologies for healing...

"Disease states are caused by energy blockages. The Kirlian photograph helps to determine the overall energy flow of the body and locations of energy blockage which are manifested in the disease state."

Today, this technology is extremely valuable in the treatment of physical, emotional, and psychological disturbances because they can be measured long before there are any SYMPTOMS (e.g. disease, depression, etc.) or before conventional diagnostics can detect dysfunction.

What's more important to you today...

## **Science Proves It... Words Have The Power To "Reverse" Chaotic Hertz And Spontaneously Heal Your Body!**

Dr. Masaru Emoto, a world-renowned scientist and author, discovered that certain word frequencies are associated with harmonious or chaotic crystalline structures.

In his fascinating experiments still demonstrated around the world today, Dr. Emoto writes the word "LOVE" on the outside of a container of water, freezes it, then does the same with the word "KILL," and shows the audience what happens to the water molecules under a microscope.

**The results are absolutely shocking...**

*The word "LOVE" forms water molecules into beautiful, brilliant kaleidoscopes of geometrically-perfect snowflakes.*

*The word "KILL" forms water molecules into dark, deformed, randomly chaotic structures.*

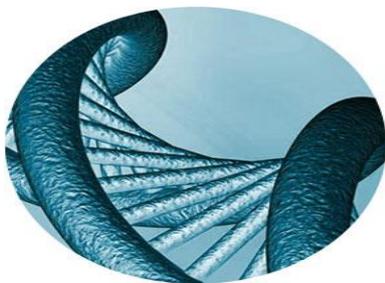

Remember, our bodies are made up of over 70% water. This is what is happening inside your body depending on the level of chaotic or harmonious hertz you carry with you.

And don't worry, this wasn't just a one-time coincidence.

In a similar study, the Institute of HeartMath in California took human DNA, put it in a test tube, and had people hold it while they said a certain word.

**The results were as breathtaking as Dr. Emoto's.**

When they held the vial and said a positive-frequency word, the DNA became harmonious. When they said a negative-frequency word, the DNA became chaotic. Our bodies are over 70% water.

**What scientists discovered is this.**

When healing word frequencies are combined with healing frequencies found in certain images, the effect on the health of the body is even greater.

Which begs the question...

## Can Certain Thoughts Influence Your Healing Potential?

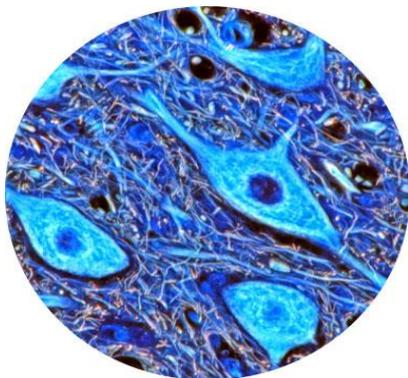

It is estimated that an average person has 10,000 thoughts or images flashing through the mind each day. Each of these images creates millions of neurological connections in the brain. These connections form energy, which influences the negative or positive frequencies we've been discussing.

Scientists know that in the average person, roughly 75% of all thoughts are negative. These negative thoughts product CHAOTIC frequencies which, as we talked about, may cause health problems from depression to hopelessness, acne to arthritis, headaches to heart disease, ulcers and to all kinds of infection.

### **Remember...**

Chaotic frequencies create destructive cellular memories, which cause illness and disease.

Conversely, it's been shown that a steady dose of the right positive-frequency images release brain chemicals that act as your body's natural stress reducer, thereby activating the immune system and decreasing the production of destructive cellular memories.

**According to Dr. Robert Rodgers, Ph.D...**

*“These thoughts that nurture the symptoms have to be released, removed, detached, ejected, and shielded before the body will return to its natural state of balance, clarity, centeredness, and overall health. As long as these thoughts remain, you are cultivating a garden of low frequencies that promote ill health. The best part of all is that low frequencies cannot exist in the presence of high frequencies.*

*This means the body will finally allow the release of the toxins and trauma trapped at the cellular level. It’s why the medicine of the future will use frequencies to heal illnesses, not medicines and surgeries.”*

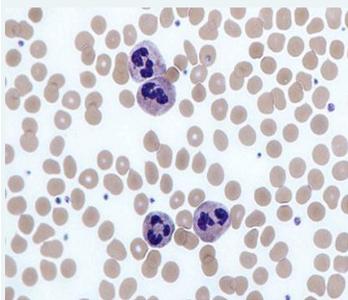

- Dr. Robert Rodgers, Ph.D.

And clinical science backs it up, too...

In one study, a group of metastatic cancer patients using daily positive imagery for a year achieved significant improvements in NK (natural killer) cell activity and several other measures of immune functioning.

At Michigan State University, researchers found that students could use imagery to improve the functioning of certain white cells called neutrophils, which are important immune cells in defense against most diseases, including viral, bacterial, and fungal infection.

The most powerful healing, however, is only achieved with the trifecta effect. When the highest healing frequency in sound is combined with the most positive, highest frequency words and images, it is, in my experience, an unbeatable combination of healing power.

*Neutrophils. Source: Wikipedia*

*By now you know and believe that sounds, words, and images can have a profound, life-changing effect on your health.*

*But there’s a problem.*

*In order for these effects to have a truly profound, long-lasting effect, you need to make it past the gatekeeper.*

## **Your mind.**

Your subconscious mind has a way of shielding itself from new changes. That's why listening to these frequencies on their own (if you can figure out how) wouldn't work. And it's another reason why TYPICAL positive thinking doesn't work well. It's also the reason you can say "I love you" over and over to yourself with no changes.

These things fail because they can't break past the brick wall of your subconscious mind. But what if you had a way to slip past your mind unnoticed, so you can slip in and get the lasting changes you need to make a transformation from stressed and depressed to calm and collected?

Luckily, I've figured out how, through the development of...
